Key Points for Fry Distribution 2019

In order to serve the people and to increase the income of fishermen, Freshwater Aquaculture Research Center, Fisheries Research Institute, COA has used limited manpower and facilities to cultivate excellent breeding fish for many years and to breed various fry for distribution and promotion. This implementation point is formulated in order to make it easier for the public to understand the relevant operating procedures and fairness.

1. Distribution target:
 - 200,000 hybrid tilapia fry
 - 20,000 red tilapia fry
 - 40,000 carp fry
 - 30,000 koi fry
 - 20,000 silver carp and grass carp fry
 - Limited number of field snails, about 2000 pieces
2. Distribution object and quantity:

All fishermen, farmers, government agencies, etc. may apply for distribution, but the tentative maximum number of distributions is 10,000 per hectare, and the distribution quantity is approved based on the applicant's breeding area and equipment.
3. Distribution method:

Register with the Center by official document, letter, e-mail, or telephone and pick up in batches according to the notification in the order, until the quantity of breeding fry is sold out. Those who have not picked up after the notice are deemed to have renounced, and the Center will re-sell it to other applicant(s).
4. Registration time: From March 15 to April 15, 2019
5. Distribution time:

The pre-order for the distribution of carp fry, koi fry, and field snails starts from late April 2019; hybrid tilapia fry and red tilapia fry start from early May 2019; silver carp fry and grass carp fry from early July 2019. The time of collection will be notified according to the order of registration.
6. Place and price of distribution:

1. Freshwater Aquaculture Research Center, Fisheries Research Institute, COA

Address: No. 106, Haipu Village, Lukang Township, Changhua County

Tel.: 04-7772175
